

Dr. Francisco Carmona

Born and raised in Spain.

Graduated at the University of Barcelona Faculty of Medicine in 1982.

Specialized in Obstetrics and Gynecology in 1988.

Doctoral degree in 1991.

Chief of the Gynecology Service of the Hospital Clínic of Barcelona, a tertiary Hospital associated with the University of Barcelona, from 2006. In that hospital, endoscopy is the usual technic for Gynecological Surgery and it was the place where the first single port gynecologic laparoscopy was performed in Spain by Dr. Carmona itself.

Member of the University of Barcelona's Department of Obstetrics and Gynecology as Professor from 2006.

Main areas of interest: endometriosis and benign diseases including pelvic floor dysfunctions.

More than 100 scientific articles published in indexed journals and more than 20 book chapters written.

More than 50 presentations in International Congress.

Invited referee for several important medical journals including Fertility and Sterility, Human Reproduction and many others.

Member of the Editorial Boards of Gynecological Surgery, Journal of Endometriosis and Medicina Clínica.

Member of different medical associations including AAGL (member of the Advisory Board until 2012 and then member of the Board of Trustees), ESGE (member of the Board Committee from 2006 to 2010), SIAEGI (member of the Executive Committee), WES (Ambasseur of the WES), and of the Spanish Gynecologic Endoscopic Society.

Director of advanced endoscopic courses and workshops from the late 90's.

President of the 19th Congress of the ESGE.
